The A to Z _____

**FEATURES GLOSSARY OF A
SCHOOL MANAGEMENT SOFTWARE**

“School management software is a tool which automates the institute’s daily operations and facilitates paperless administration for the schools, resulting in better growth and higher productivity.”

In this digital era, it is vital and requisite that every institution should have a modern and reliable school management system, so that they can make better and faster decisions to maintain the growth of the alliance. But sometimes due to unawareness of the important features of school software, school might end up using a software which fails to fulfil their needs.

That’s why we decided to create a school management software feature glossary which will help you to comprehend the role played by every feature in a school’s structure

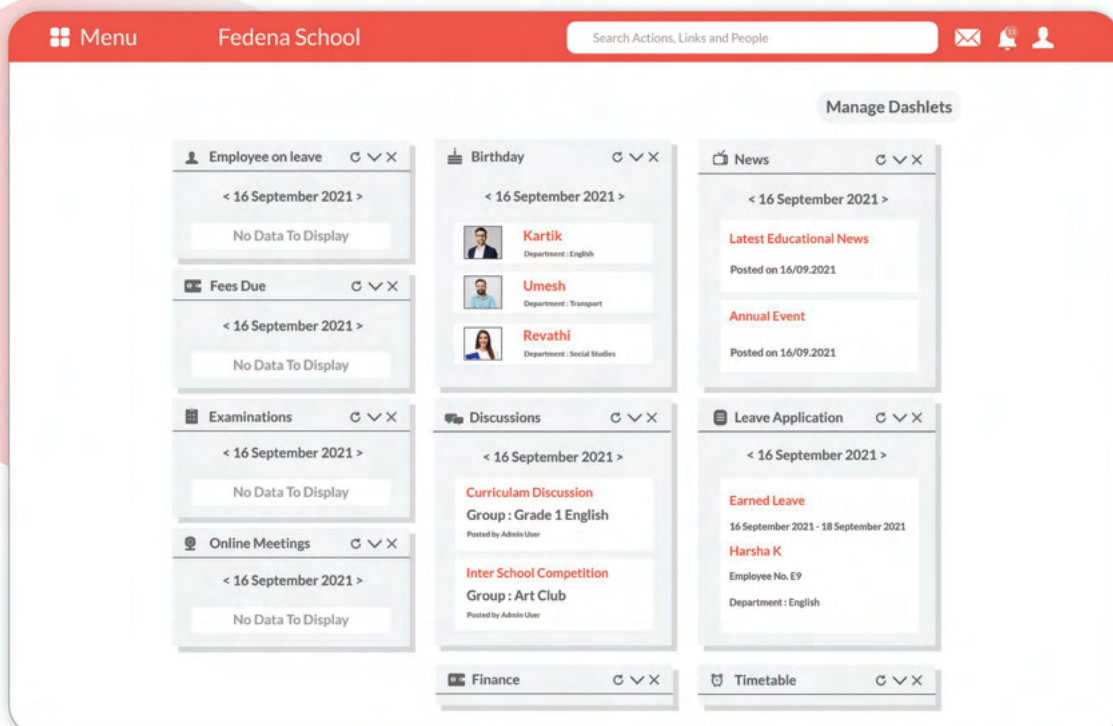

So here are the A to Z features of school management software:

A Admission System

Comprehensive admission forms and various certificate formalities increase the carbon-footprints and create a vexing environment for the parents. Since sometimes, to complete all the formalities they have to miss their crucial working hours to complete the process.

With the Admission System, institutions easily manage the student's record & data related to the students. Parents can easily attach any type of document online without visiting the school frequently. Adding to that, the system provides a biometric identification which saves time and effort of both the administrators and the parents.

What all you can do:

Streamline Admission Process:

- Verify original documents digitally and collect admission fee in a click
- Automate batches & subjects allocation
- Customize the admission form
- Create unique admission ID for all students
- Easily set students emergency contacts such as guardian details and more
- Send timely updates to parents or students regarding the admission test date, results, admission student and more.

Centralised Data Management

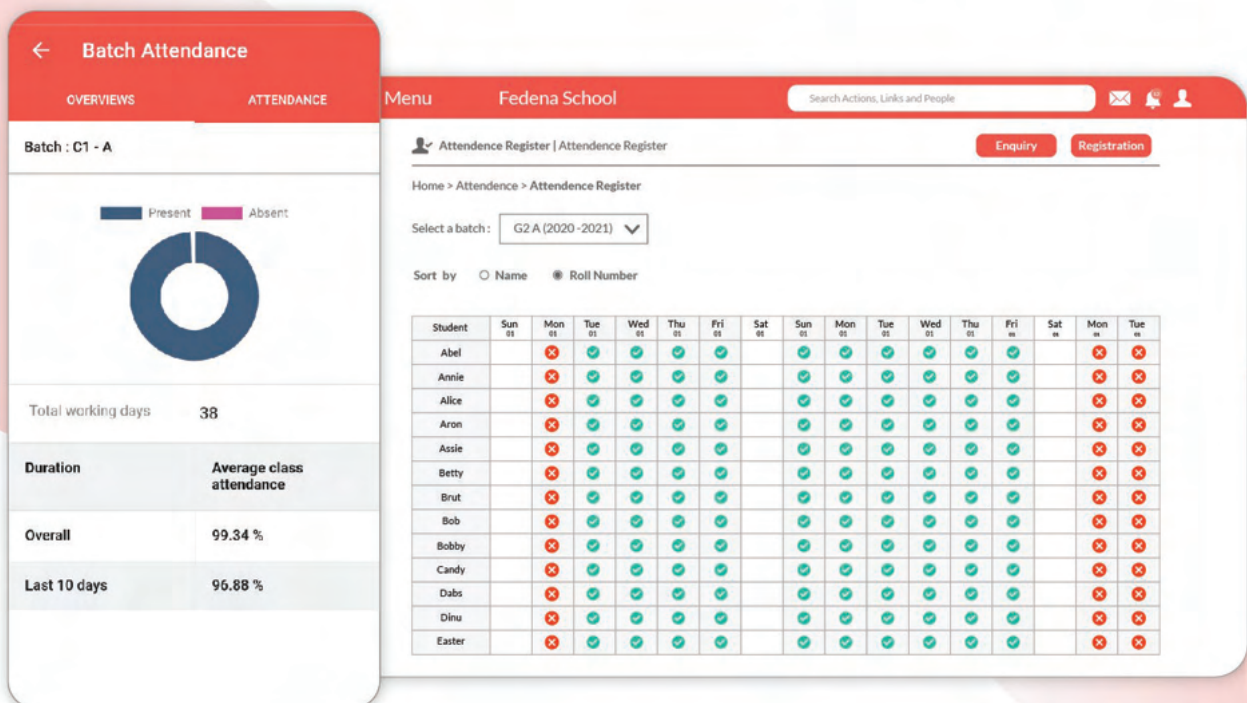

- Store the academic records of students & employees documents in one place.
- Save all documents in a digital format
- Generate custom reports and control accessibility

Manage Admission Enquiries with the Admission Enquiry Module

- From the Enquiry Analytic Dashboard, admin can view all the applications regarding new admission, track sources and generate insightful reports.
- Parents/students can enquire about new courses and keep a track on the complete admission process.

A Attendance Management

Comprehensive admission forms and various certificate for malities increase the carbon-footprints and create a vexing environment for the parents. Since sometimes, to complete all the formalities they have to miss their crucial working hours to complete the process.

What all you can do:

Track Attendance Subject or Day wise

- Set student attendance type either day-wise or subject-wise.
- Mark student attendance for a half day or full day with/without reason in just a click.

Track Latecomer & Monitor Leave Request

- Track latecomers by enabling custom attendance.
- Request & monitor leave request from both web and mobile app.

Employee Attendance & Leave Management

- Manage employee attendance and leave requests effortlessly.
- Employees can also view their leave balances and track their leaves for each month.
- The conjunction of payroll feature with attendance, automates the complete payroll calculation.

Comprehensive Reports

- Generate student day-wise/ batch-wise attendance reports and leave reports in no time.
- Store all attendance data in digital format.

Biometric Integration

- Using Biometric integration, to automatically mark the student attendance.
- It eliminates the possibility of proxy attendance and in real time students movement can be monitored within the premises.

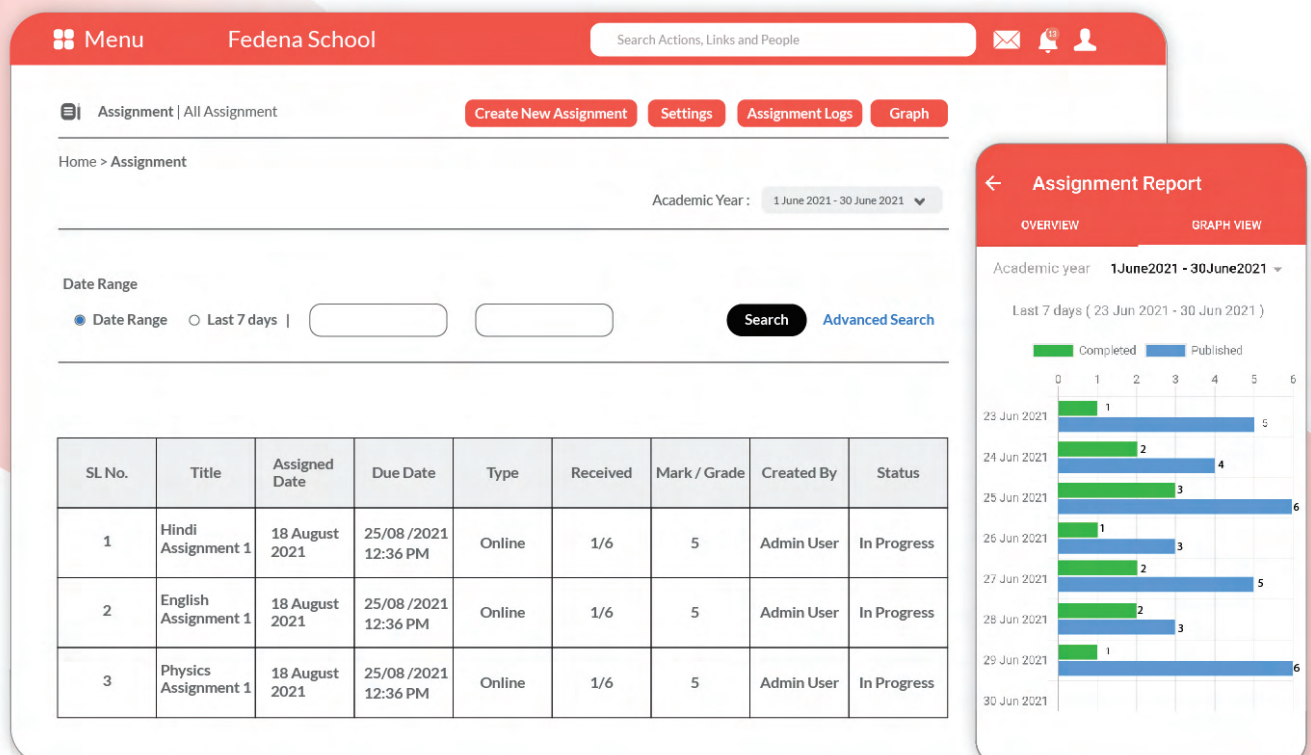

Track Attendance via Mobile App

- Mark student attendance directly from mobile app enables faculty to manage attendance from anywhere without being in front of a computer. Additionally, in a second students can also apply for a leave and their parents & faculty get instantly notified.

A Assignment Management

Assignment submission is the most tedious and boring task according to most of the students. Even though the students realize them to be necessary, they try to skip doing them themselves and copying from their fellow classmates, with the thought in mind that the teacher would find it nearly impossible to go through all the bundles of papers.

With an Online Assignment Management module, teachers can easily track the submission and allot the submission date so that everyone will remain aware of their duties. It is also eco-friendly since it discourages paper wastage and with the proper system, the records can be maintained for a long time.

What all you can do:

Create Online Assignment

- Create assignment via web or mobile app and share it with students in few clicks.
- Add assignment submission type filter such as - Online and Offline type.
- Attach digital content, enable comment section and grade entry while creating new assignment.
- Add the due date while creating the assignment.

Manage Assignment Logs

- Assignment log for assignment audit, to track the assignment publish date and username details.

Generate Assignment Reports

- Generate graphical & tabular reports in web and mobile app, to track published and completed assignments.

Manage Assignment via Mobile App

- Publish new assignments and submit assignment's answers via mobile app.
- Use filters to track the status of the assignment.
- View graphical and tabular reports in mobile device as well accept or reject an assignment submitted by a student.

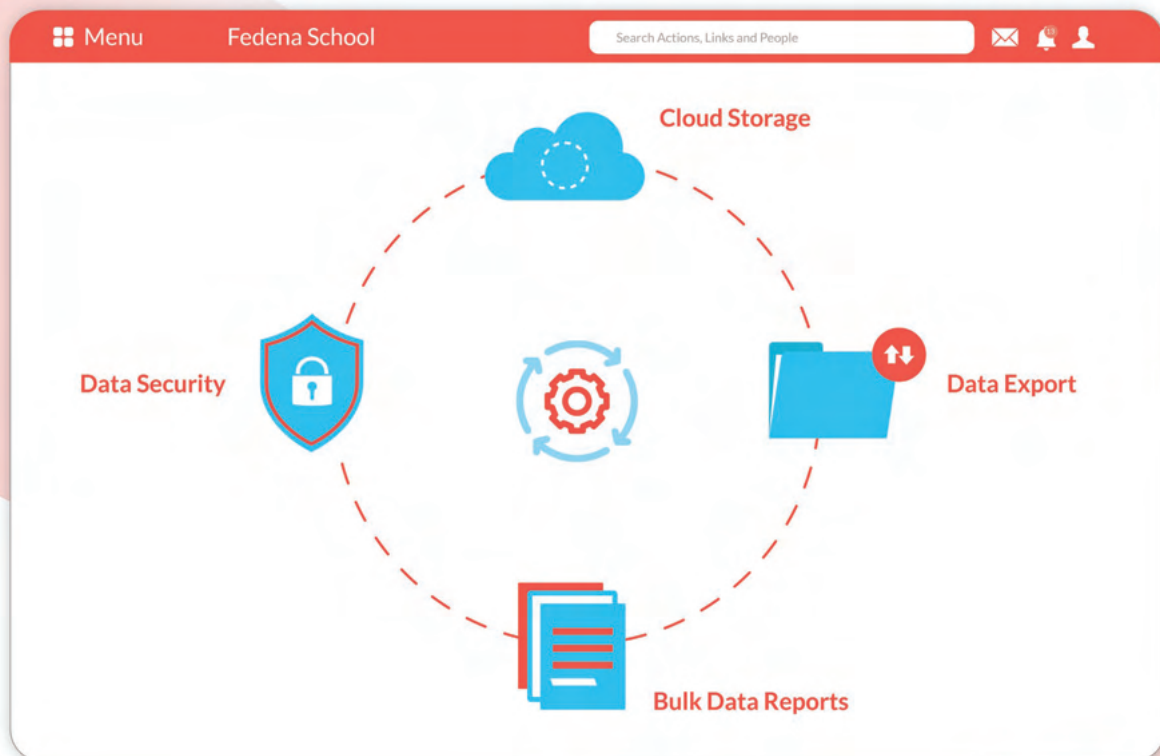

Assignment Settings

- Add additional fields to make assignments more comprehensive.
- Link to existing grading profile to add grade on the assignment.

B Bulk Data Management

An excel sheet has been a part of an administrative system for a very long time. But when it comes to big data, institutions require a proper data management system, to impeccably manage the valuable resources of the institution on a single platform.

Every institution has its own format for storing the data. With the Bulk Data Management module, administrators can easily categorize the data and customize the fields according to the user's demands. Most importantly, it provides data security along with recoverability using data backups.

What all you can do:

Minimize paperwork

- Centralized place to manage entire data of your institution in a digital format.
- Easily customize the fields and add information on any records as required by the user.
- Edit/Delete Data categories.
- Add a new entry into the existing category.

Data Export and Reports

- Export data in CSV or XML format.
- Save records in the form of reports for analysis and record keeping.
- Print the records in a single click.

Highly secured and reliable cloud storage

- Only authorised users can access the data thus enhance data safety.
- Provide data backup facility.

C

Course and Batches

Jumbled up course/batch structures are not conducive to a managed learning, and are quite troublesome to maintain.

Course and batches management system allow admin to keep a track of every old and new course and batches between a specified period.

This integrates well with other systems like admission, examination and many others, through which enrolling the students, defining the time table and creating the examination for every academic year becomes easy for the administrators for every student's specific batch.

1	John	S7
2	Riya	S6
3	Shilpa	S5
4	Student 1	S4
5	Student 2	S3
6	Student 3	S2

What all you can do:

New Course/Batch

- Manage multiple courses for all grade level.
- Create/edit/delete course and batch detail.
- Assign class teachers with specific privileges related to the allocated batch.
- Assign subject fee amount for a batch.

Manage Subjects Details

- Manage subjects corresponding to different courses or batches.
- Based on students preference assign courses to them.

Access Students Info

- Access students detail according to course or batch-wise.
- Setup and generate students' roll number.
- Send instant alert to parents or students in case any change on assigned course and batch

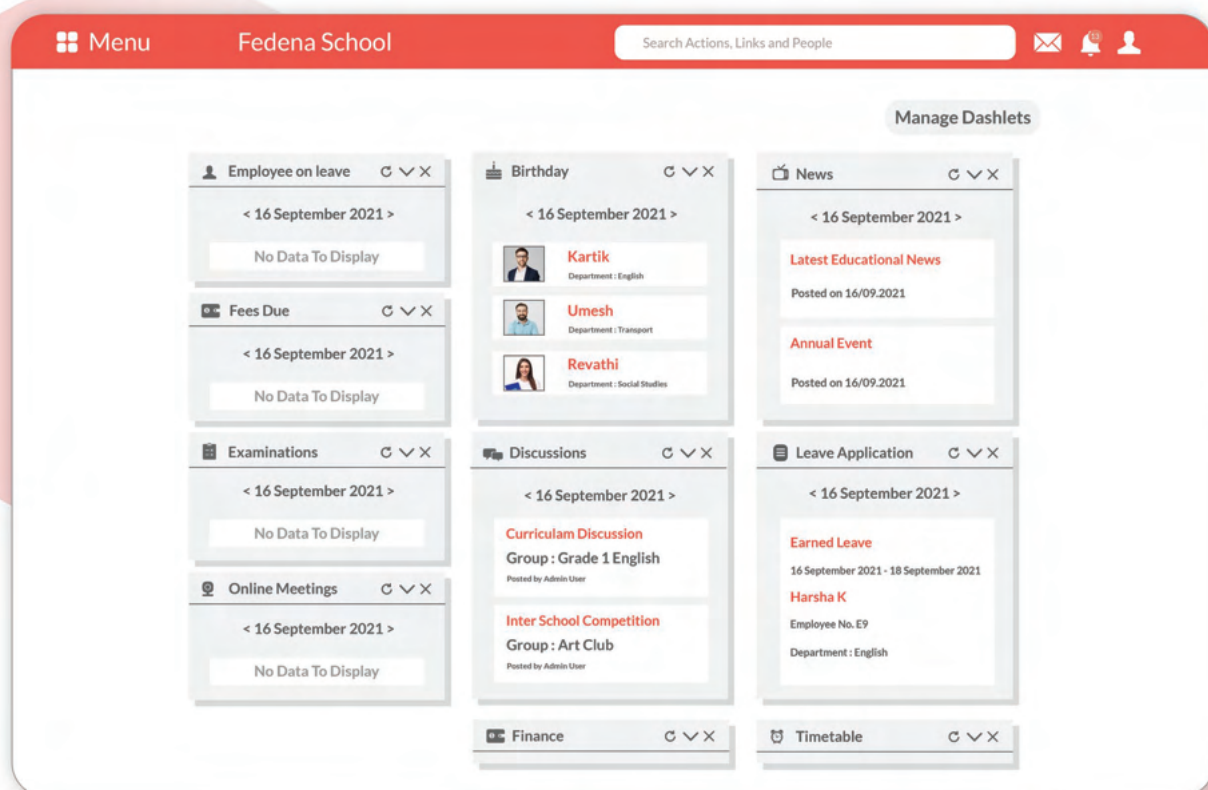

NEW! Floating Elective Subjects

With this feature, enable an elective group as a floating elective, and subjects from the floating elective group can be assigned individually to the time slots.

D Dashboard Customization

“Oh sorry, it just slipped out of my mind”, it’s a very common phrase uttered by overloaded and stressed out people, when they are heavily indulged in their work and miss out on tasks.

A beautiful dashboard in your school structure that showcases various scheduled tasks, pending tasks, and notifies the user about various trends in their institution certainly makes your day. School ERP software facilitates a customizable dashboard that gives an update on the latest news, events, discussions, birthdays and leaves applications.

What all you can do:

- Dashlet driven dashboard.
- Innovative 'Search bar' enables anybody to use Fedena School ERP System within seconds of log in.
- Fedena School ERP Software is designed for great user experience with a user-friendly interface, meaning that anyone with basic computer knowledge can quickly use the system with minimum training.
- Easy to learn and easy to master.

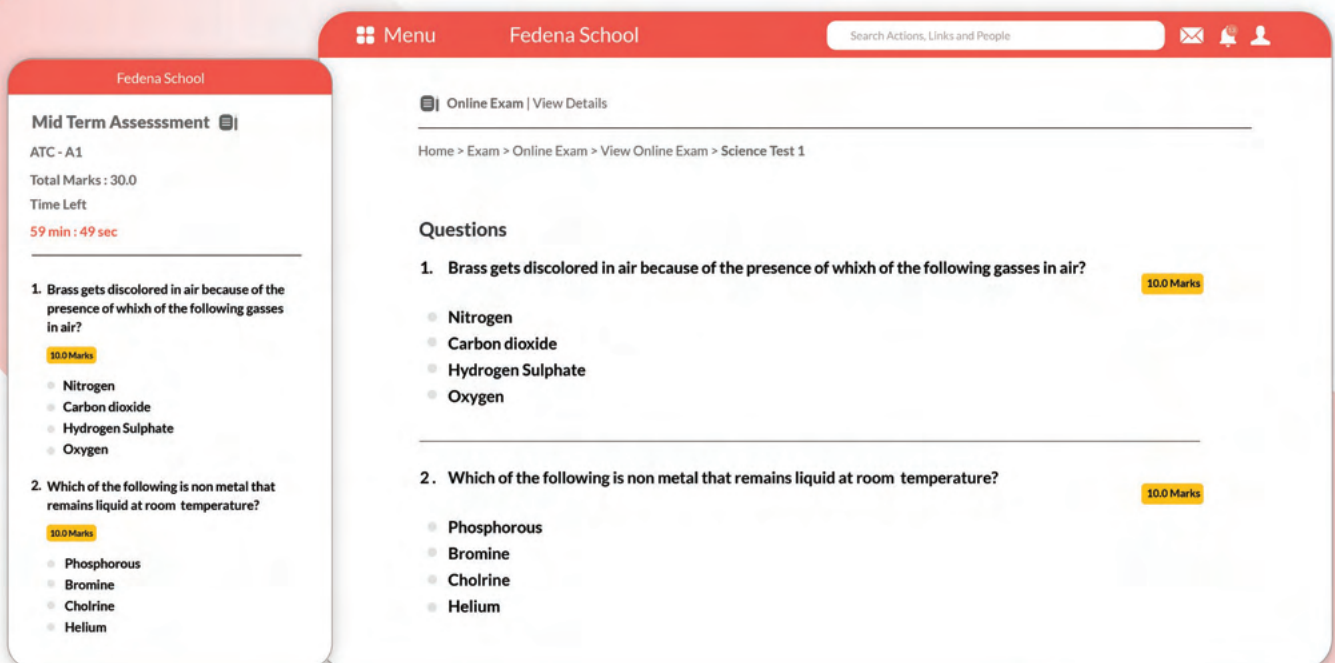

E Examination Management

Conducting exams is an arduous and time taking process. It takes months of preparation, countless paperwork and lots of laborious planning.

It's a hassle for administrators and teachers, due to tremendous paperwork.

With school software, the institution can conduct exams online and easily get a track on individual activities. It's also easy to group the exams, create a statistical and analytical report to track the student's progress.

According to this, some measures can be taken by the teachers to improve their pupil's performance.

What all you can do:

Exam Management

- Edit or delete exam schedule at any time.
- Create different types of exams based on grades, marks.
- Schedule exam for all batches.
- Easily edit the mark of the students for active and inactive batches.
- Flexibility for teachers to enter marks and update it whenever necessary.

Exam Reports

- Create batch & course wise exam report
- Create reports for CCE, ICSE, CWA, GPA or CBSE grading systems.
- Customize report card field settings.
- Instant exam reports publishing.
- Instantly send exam result alerts & notifications to parent.

Online Exam

- Create an exam either descriptive type or MCQ type.
- **NEW!** Students can attend scheduled exam via mobile app.
- Create timer based online exam.
- View the exam results in the mobile app itself.
- Online exams with automatic marks calculation.

Gradebook Management

- Set up CEE, ICSE, CBSE, GPA and CWA grading system.
- Import marks in bulk. Also, import planner and set up for a new academic year.
- Gradebook provide student, subject and consolidated reports at one place.
- Create student activity & marks based grading exams.
- Skill-based mark entry for each subject can be shown in the report card.
- Auto-populate the attendance and add remarks in Gradebook Reports.
- Set up various grading level.
- Can set up internal assessment calculation mode.
- **NEW!** Gradebook mark entry is now available in mobile app as well.

F Finance Management

Finance is a comprehensive and indispensable department of every institution. It handles the fee structure, payroll of employees, assets, and liability of the institutions and many more. Handling it without any robust and reliable software is a daunting task for the finance department.

The finance system in school software provides a fast and efficient way to track each transaction and easily create a financial report, which can be used to get an insight into the profits and expenditures. Along with that, the staff can manage the online fee submission which shields the parents from unnecessary anxiety.

Pay Fees Now

What all you can do:

Fees Management

- Fedena incorporates all types of fee structures followed by different institutions worldwide.
- Schedule fee collection dates.
- Do fees set up based on student category or course-wise.
- Create Master Particular and Discounts to multiple fee heads.
- Using Fedena Mobile App, pay fees from anywhere at any time.

Fee Receipt and Advance Fee Payment

- Design fee receipt template.
- Customize receipts template headers & footers.
- View student, employee and guest fee receipts from a single dashboard.
- Invoice is available for all payments.
- Collect fees in advance and use it later for the future fee's payment such as transport fees, academic fees and more.

Fee Defaulters & Online Payment

- Check the fee defaulters.
- Send a reminder to students/parents about the pending fees via sms/email.
- Collect fees online by integrating Fedena with available Payment Gateways.

Fee & Other Finance Reports

- Transaction report, tax collection report, particular wise student report and access many other reports in one go.
- Record the institute 's everyday transactions.
- Easily compare financial transactions of two different periods.
- Financial Report generation facility with a customizable date range.

Instant Discount and Tax Calculation

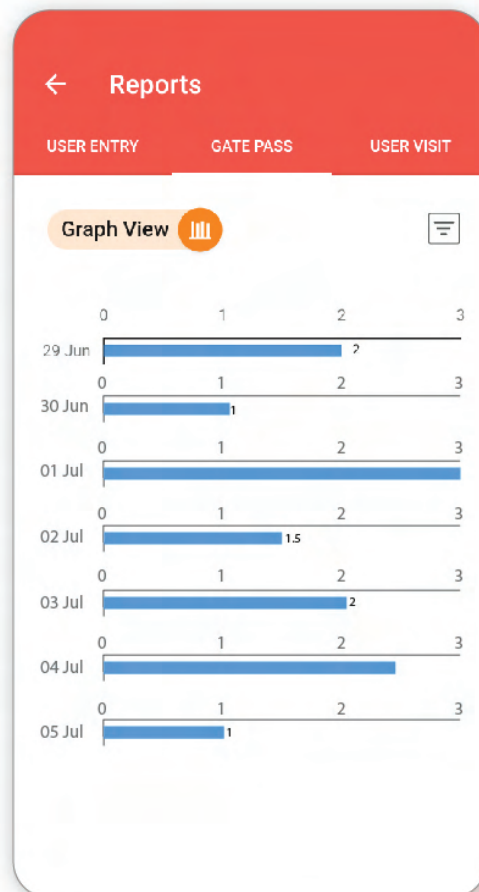

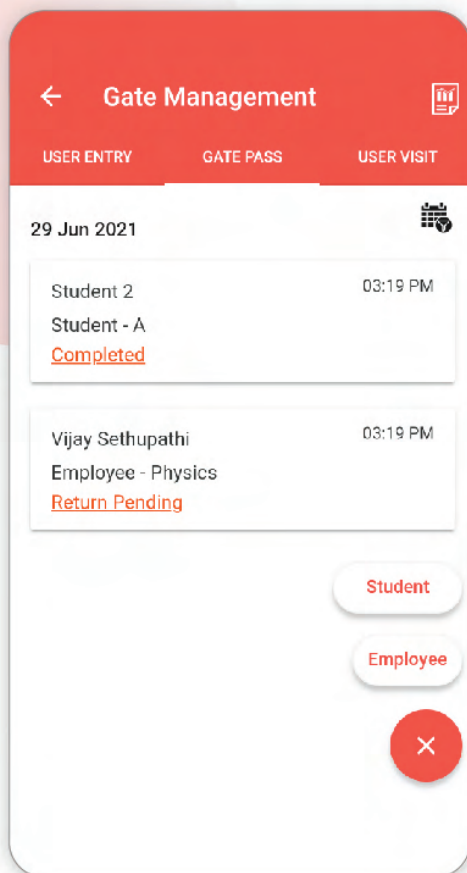

- Add fixed/instant discounts on fee collection.
- Enables tax on all types of fee transactions.
- Manage fees refund/revert.
- Create & manage applicable tax slabs.

Other Finance Transaction

- Manage staff salaries and income tax deduction.
- Manage Donations, Assets and Liabilities.
- Control Finance data accessibility.
- Group various transactions under fee account.

G Gate Management

Prevent the unauthorised entry in your institute premises with Fedena's all new Gate Management Module. Gate management is a mobile app first feature to record the entry and exit of visitors, students and staff members. This monitor and tracks daily visitors entering your schools. Our module helps in enhancing the security of your institution and provides detailed graphical and tabular reports on visitors' in/out timings.

What all you can do:

Gate Management via Mobile App

- Easily create visitors, parents, students and employees gate pass in a few clicks.
- Record visitors in and out time, and filter the list of total visitors visited in a specific period of time.
- Store visitor details such as photo, name, purpose of visit and more in database.
- Verify visitors authenticity by OTP validation process.

Visitors Reports

- Generate graphical and tabular reports to track daily visitor.
- These reports are available in both web and mobile applications.

Gate Management via Web App

- In the web app, manage visitors pass settings such as pass number format, enabling sms notification, mobile phone OTP verification and more.
- Customise user entry, gate pass and user visitor form, also add custom field in the form according to your institution requirements.

Gradebook is a way through which teachers keep track of individual student's performance and maintain their grade records.

But maintaining everything on paper increases the workload, and shortens its lifespan to a few years at max.

With the grade book in the school ERP system, an administrator can create multiple examination structures based on the institution's education board such as CBSE, ICSE, etc.. Those structures can further be divided into one or more terms. Additionally, both subject-based and non-subject-based evaluations can be created and marked.

H Hostel Management

Procuring a suitable roommate is a struggling task for each student. Along with it, the security and comfort of students is also a priority for the hostel management crew. Besides that, the vast tomes of student records and cumbersome paperwork are prone to human error.

Implementing this school ERP in an institution eases out the room allocation for the warden, whereas the students can easily process a room change request. Besides that, a warden can keep all the records safely stored in encrypted storage. Hostel keepers can also collect the hostel fee online.

What all you can do:

- Simplify Room Allocation.
- Easily manage hostel fee collection, view hostel fee defaulters.
- Digitally maintain hostel records.
- Create reports in case of any change in room/rents.
- Check the room availability in a single click.

H HR (Human Resource) Management

Maintaining all employee's details from their admission to exit and managing the entire payroll structure is a painstaking task for the HR team.

Along with that, keeping a monthly track on the employee's attendance, leaves, accomplishments and salary slips makes the HR professionals bogged down. Due to which some time institutions need to hire new manpower, which increases the cost of labor.

With an employee management system, without investing extra in manpower, the institution can keep a record and organize all employee details in a single platform. Automates the loss of pay calculation and monthly/weekly payslip generation, results in amplifying the employee's performance.

Rajitha P (E10)	-	-	-	-	-	-	-
Teena (E8)	-	-	-	-	-	-	-

What all you can do:

Organise Employee Data

- Manage employees details in one place.
- Upload employees data with bulk import option.
- Revert the archived employees' details.

Manage Payroll

- Automatic Loss of Pay calculation.
- Generate payslips on a daily, weekly, monthly basis.
- Do payroll setup for variations of earnings and deductions.
- One-click payslip approval and reject facilities.
- Configure payslip report settings.

What all you can do:

- Efficient leave management system available
- Generate a leave balance report for selected duration.
- Automatic leave reset where you can automate the leave addition process for a whole year and complete the year-end leave transfer process effortlessly.

Inventory Management

Handling vast tomes of inventory data is a daunting task for inventory managers. Manually tracking the item's order details and supplier information is not only a time taking process but also prone to calculation errors.

With a school ERP system, institutions can efficiently get a track on the utilization of the materials or items, easily maintain and record the supplier details. Along with that manage the digital invoices and preserve the notes on particular items online.

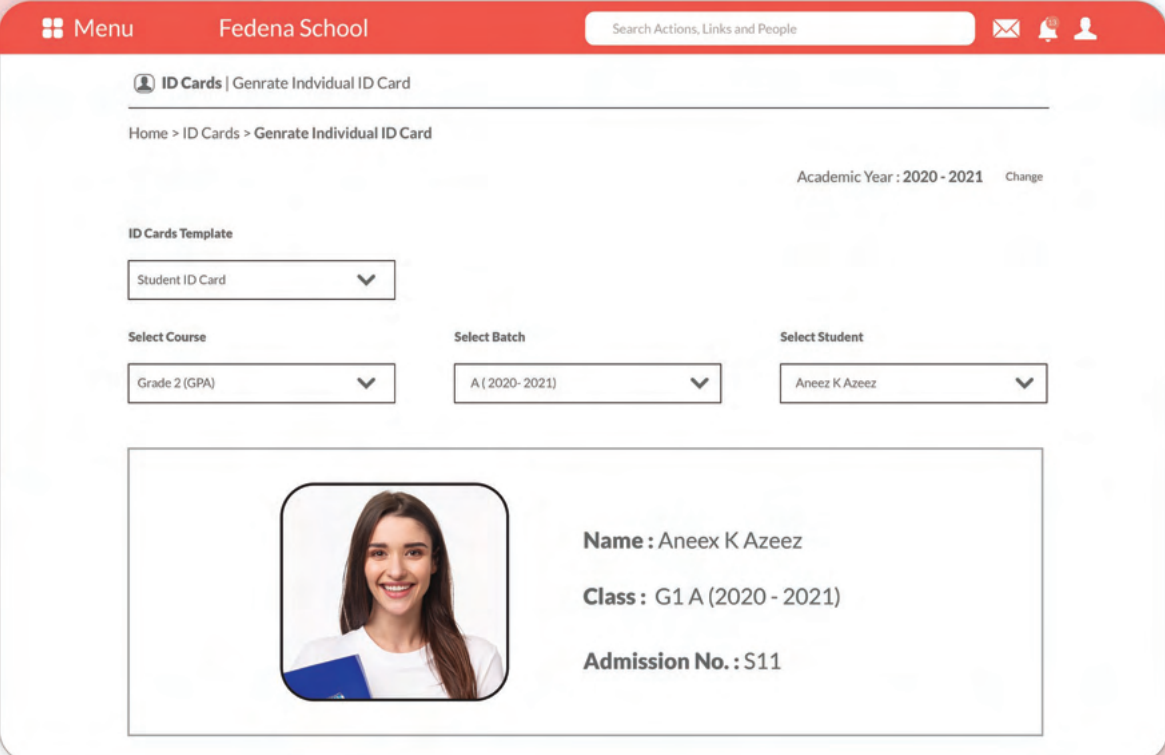

What all you can do:

- Manage and create store categories, store types, store item, supplier type and supplier details.
- Monitor indents and purchasing items for institutions.
- Complete tracking on the inventory management process.
- Create digital invoices and goods received notes.
- Maintain GRN (Goods Received Notes)

ID Card & Certificate Generator

With the ID Card Generator,

- Institutes can create customised ID card templates for student and employee ID cards as required.
- Design single or both sided cards, add background images, barcode, and more.
- Include custom and system data using field codes while generating ID cards.
- ID cards can be generated in bulk or individually for each user in 2 sizes – A4 Canvas or in ID card size.

The screenshot displays the 'Fedena School' web application interface for generating an individual ID card. The top navigation bar is red with a 'Menu' icon, the school name 'Fedena School', a search bar labeled 'Search Actions, Links and People', and icons for email, notifications, and user profile. The main content area has a breadcrumb trail: 'Home > ID Cards > Genrate Individual ID Card'. On the right, it shows the 'Academic Year : 2020 - 2021' with a 'Change' link. The 'ID Cards Template' section features a dropdown menu currently set to 'Student ID Card'. Below this are three selection fields: 'Select Course' (dropdown with 'Grade 2 (GPA)'), 'Select Batch' (dropdown with 'A (2020- 2021)'), and 'Select Student' (dropdown with 'Aneez K Azeez'). The bottom section shows a preview of the generated ID card, which includes a student photo on the left and the following text on the right: 'Name : Aneex K Azeez', 'Class : G1 A (2020 - 2021)', and 'Admission No. : S11'.

Certificate Generator in Fedena,

- Create certificate templates for students or employees with the Rich Text Editor.
- Use field codes to add the system data as well as custom data in the certificate.
- Upload backgrounds, add user photos and barcodes to customize the certificate as per requirement.

Certificates can be generated in bulk or individually for selected users.

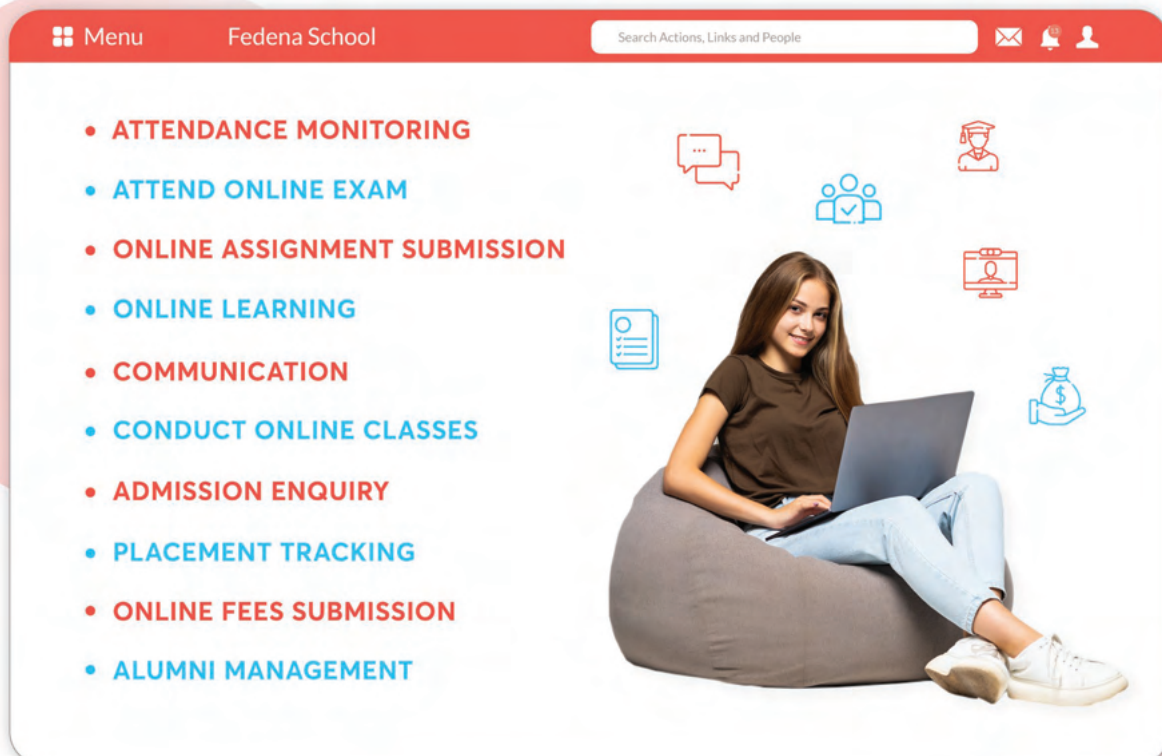

Students Journey Management

Providing an excellent learning journey and fostering the personal growth and self-esteem of each student is a vital part of every institution.

But it becomes a troublesome task for the teachers and admins when they do not have a proper system to track the individual performances.

With School ERP software, admins and teachers can monitor the student's growing and learning journey from their admission to the time they leave the school.

What all you can do:

- **Attendance Monitoring** - Track daily attendance and monitor leave
- **Online Assignment Submission** - Easily submit answers for online assignments and track pending assignments through the mobile app.
- **Attend Online Exam** - Students can attend the online exam via mobile app, also check the result online.
- **Online Learning** - Provide interactive online courses and study material beyond classroom boundaries.
- **Communication** - Get instant notification about events, news, fee schedules, new forums and holidays etc. Also collaborate with teachers and classmates via mobile app.
- **Conduct Online Classes** - Integrate Fedena with Zoom, Meet and other video conferencing apps to conduct online classes from anywhere in the world.
- **Admission Enquiry** - Upload and download notes/assignments for the teachers.
- **Placement tracking** - Students can get a track on the entire placement activities.
- **Online Fees Submission** - Pay fees online in a few clicks. Track pending payments and add discounts availed by your institution.
- **Alumni Management** - Build a strong relationship with alumni via SMS or email platform. Exchange ideas with alumni and prepare themselves for the upcoming challenges.

L Library System

Cataloging the books and maintaining the record of each book such as issued date, returned date without using any smart system is cumbersome for the librarians. It is not only time consuming but also increases the cost of labor.

That's why modern school software has become a necessity for every library structure, using which a librarian can easily manage the books and filter out the book availability according to the needs. On the other hand they can easily go through the user history and can locate any book in the library with just a click.

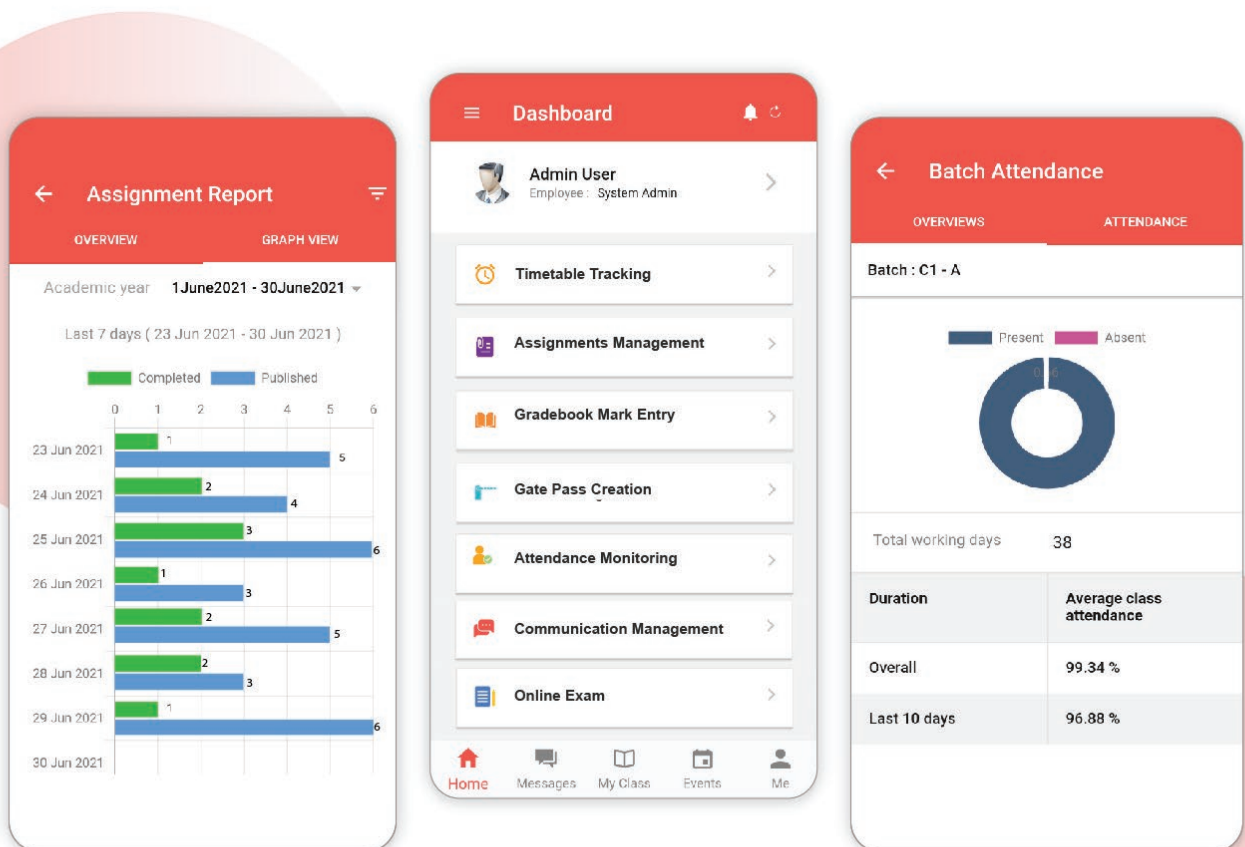

What all you can do:

- Browse through library books catalog and identify the book(s) to be issued
- Manage library books
- View/Edit/Delete/Add/Search books
- Add books with custom tag facility available
- Filter book using available filters
- Normal and detail Search for a book available
- Manage book returns
- Manage book issue
- Initial library setting for courses available
- Issued/Renewed book status
- Manage books renew

M Fedena Mobile App

Mobile has become a crucial part of our life, each individual person spends an average of 4 hours per day on their mobile device. Which is why it has become a crucial medium for every industry marketer to target the audience.

Fedena School Management App is an ideal solution for your institution to grow to the next level. With mobile apps, institutes can manage day to day functionality on the go. Online fees submission, attendance management, visitors management, timetable tracking and much more. In today's connected world, give the best digital tool to your teachers, students and parents. Enjoy the benefits of having a dedicated school mobile app in your institution's name

What all you can do:

- View & pay fees online from anywhere in the world.
- Mark and track students attendance.
- Interact with teachers through messages.
- Students can view their timetable.
- Create online assignments and share it with students.
- Students can submit the assignments and track pending assignments.
- Record entry and exit of visitors in school premises via Gate Management Feature.
- Get notified about upcoming events, announcement and other alerts instantly.
- Easily view timetable and upcoming classes on the go Attend scheduled online examination.
- Enter marks and grades for examination directly via mobile app.
App gets branded in your institution name.

N **News management**

Announcing the news/updates in the institution's gallery cork board is not only limited to the particular audience but also leads to more paper wastage.

With this system, administrators and privileged employees can publish news/notification on the online dashboard about the latest happening in the institution. Along with that readers can comment on the published news and also moderate their comment if the comment moderation option is enabled. Additionally, students can search for any news using the search bar.

What all you can do:

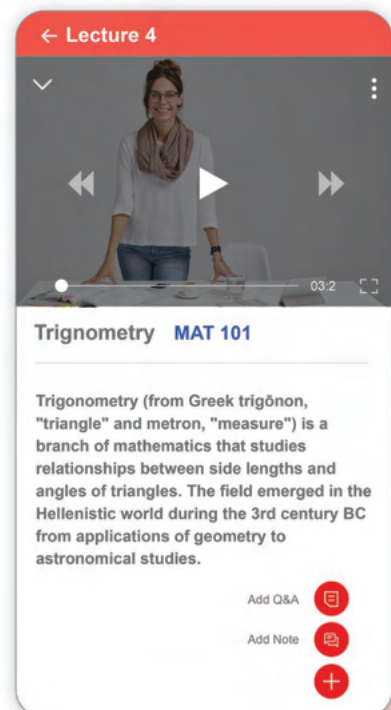

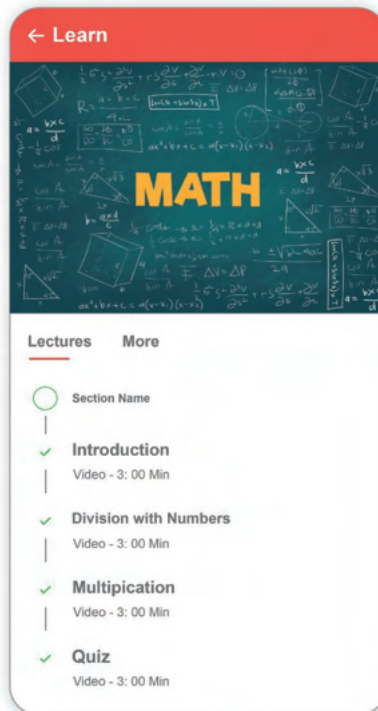

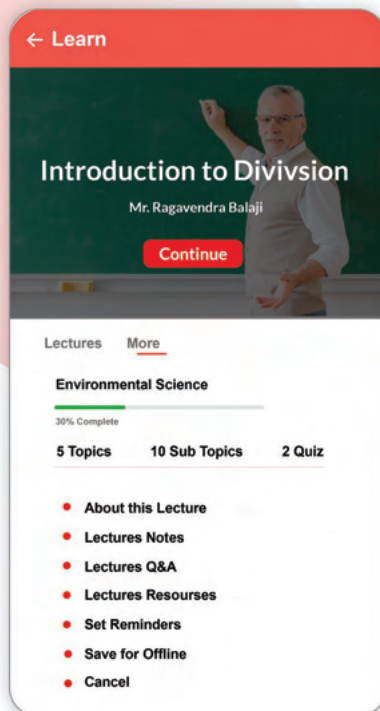

- Create/edit/delete news
- Search for any news using the search bar
- View all news facility also available
- Add News using rich text format
- Enable or delete comment facility for selected article
- Attach files to the news article

Online Learning Module

Fedena Learn is a combination of ERP & online learning platform for educational institutes which allows teachers to deliver media-rich customized courses, promote an interactive learning environment beyond classroom boundaries and provide better operations controls for admin from a single platform.

Fedena Learn powered by Uzity, our LMS simply enables Fedena powered institutions to manage online learning and daily academic and administrative activities from a single platform.

What all you can do:

Courses Management

- Create end-to-end customized and engaging courses
- Add your favorite teaching materials such as videos, audio, images, text, presentations, and documents, to make the course more engaging.

Stream Recorded Lectures

- Teachers can record the lectures and share them with the students. Students can watch the recorded lectures at their own convenience via any device.

Mobile Learning

- Students can download content within the app.
- Watch recorded lectures in offline mode.
- Track the course progress.
- Students can ask any question regarding any course and share it with instructors and classmates.
- Add MCQ and descriptive quiz in the course and assess the student's progress through the course.

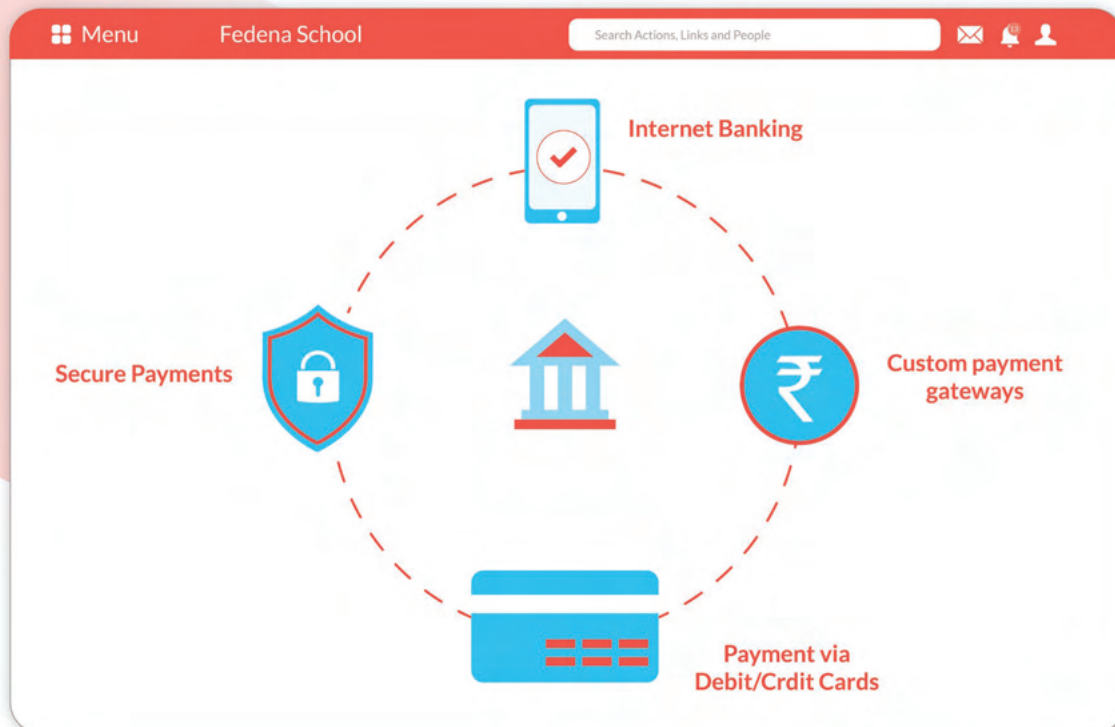

Collaboration

- Instructors can communicate with learners in real-time and vice versa.
- Additionally, students can share their ideas, ask questions and interact with their classmates.

P Payment Gateway Integration

The growing scams on the internet such as hacking, card phishing and many more have made the parents skeptical about the online fee transaction. They feel insecure to make a payment through online channels and that's why they try to skip this payment medium.

Using the secure payment gateway, users like parents, teachers, and admins can perform secure online fee payments by methods such as credit cards, debit cards, net banking, and so on. Using the school software, transactions are handled securely through encrypted channels.

What all you can do:

- Custom payment gateways can be configured at three different Fedena access levels.
- Account Administrator can configure and assign payment gateways to the institutions.
- Institution can also configure their own payment gateway.
- Payment Gateway account split framework to direct the cash flow to different accounts.

Queueless Structure

During the new enrollment and fees submission in most of the institutions, parents and students suffer from extremely disruptive queues. As most of the institution provides waiting areas but when all the operations are administered manually then the process becomes time taking and also intimidating tasks for students and parents.

School ERP systems streamline the heavy flow of work, automate the processes, mitigate the time spent by parents, students, and teachers waiting in line to get their work done. Along with that, it increases the institution's growth and productivity.

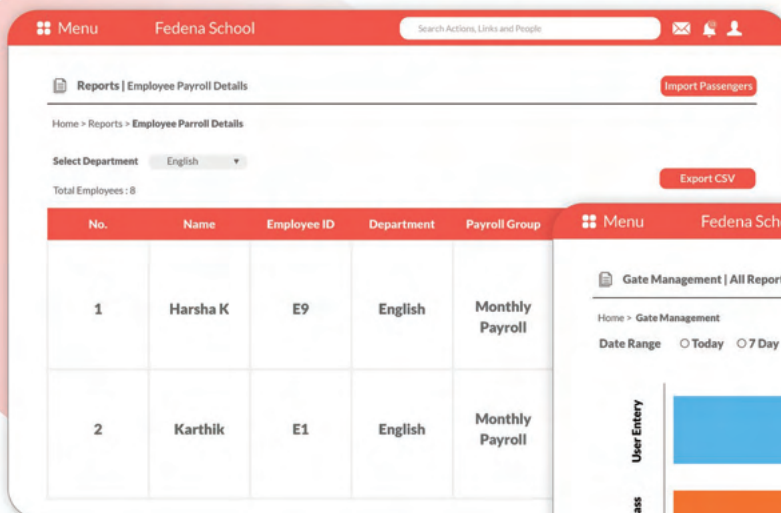

What all you can do:

- Online payment facility.
- Collect application fee through online payment.
- Online submission of notes/assignments by the students.
- Students can online submit the admission forms.
- Automatic SMS alerts about pending or upcoming tasks/events.
- Manage hostel fee collections online.
- Students can track the placement status.

R Report Center

Graphs, charts, data, and analytics are the way to measure the growth and productivity of the institution at just a glance. To create these graphical representations manually is time-consuming, due to which the institutions normally hire new staff which adds to the institution's maintenance cost.

Report centers give a 360-degree view on all stakeholder's progress and performance. Using this the institutions can create various reports on students, employees, courses, fee schedules, and many more. Reports can also be customized using a wide range of filters.

S SMS Integration

As the parents play a vital role in student academic growth, they need to have a bird’s eye view of their child's progress and performance in the classroom. Adding to this, the communication between the parents and teachers should be transparent, synchronized and periodic to get the latest updates on the curriculum progress.

This can be achieved through proper communication channels. With SMS integration, communication becomes fast, and administrators can send instant alerts to the parents about specific events in the institution and without any time constraint parents can connect with the teacher and get feedback on the child’s performance in the classroom.

- Account Administrators can continuously track SMS usage by their schools.
- Individual schools keep track of their SMS usage
- SMS package can be deactivated anytime
- When any event triggers an automatic message can be sent
- Can send SMS to all Fedena users in one shot

T Transport System

Children's security is not only a priority for the parents but also for the institutions when they're traveling between school and their homes.

The bus conductors used to mark the attendance of the students which is error-prone.

With this system, institutions can track the bus routing details, collect the fees online and maintain the database of all the students subscribed to the bus facility.

- School Bus GPS integration available in Fedena mobile app

User Management

In a world without the user management systems, it was the job of a principal and other managers in the institutions to assign the roles to their staff personally, and any such change in the responsibilities would require them to organize a meeting, informing them about their new roles.

This created problems with difficulty in reorganizing existing roles, creating new roles, and maintaining which role is allocated to which user.

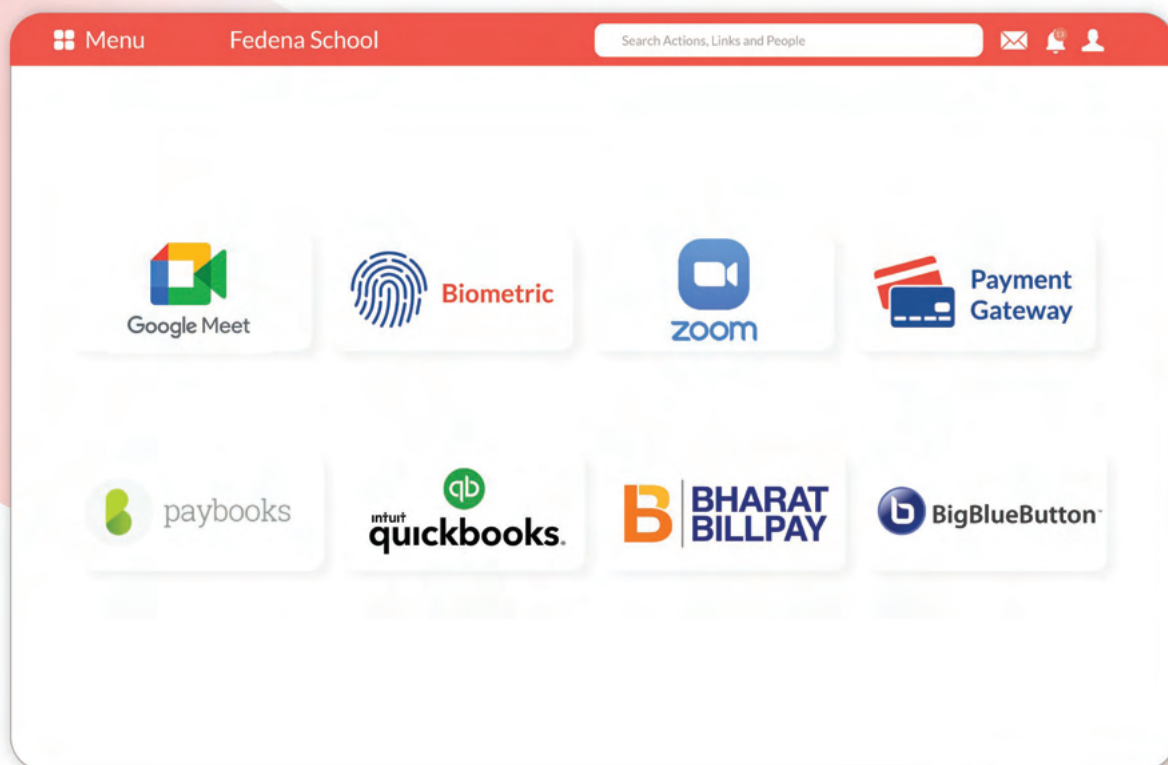

With the user management system, the administrator can manage user privileges based on their role in the institution. Admin can create a new user, provide a password and grant and revoke their access. According to the role, an individual can access the fields and view their responsibilities.

What all you can do:

- **Parents** - Track their child's academic progress and frequently interact with teachers without physically present in school premises.
- **Students** - Students can access the online courses and lectures on any device also interact with their classmates and teachers beyond the classroom boundaries.
- **Teachers** - Teachers can track their daily tasks, manage time consuming tasks like pro and more focus on delivering quality education to students.
- **Admin** - Admin can automate their daily time-consuming tasks, set privileges to users as per their roles, also control the features accessibility based on users responsibility.

V Various Integration

Fedena offers integration with your favorite applications. Fedena was built to integrate with other apps and services you use every day. Find tools that you already use or discover new ways to improve your institute productivity.

Multiple Integration available in Fedena:

Zoom, Google Meet, Big Blue Button, Quickbooks, Paybooks, BBPS, GPS, Payment Gateway, Biometric device and many others.

Workflow Tracking

Manually monitoring the progress of employees and students is not only time taking but also increases the labor cost, because maintaining the individual progress properly, the institution needs dedicated staff.

With the ERP system, the institute's decision-makers can easily view the progress report anytime from anywhere and make a timely decision for improved productivity.

What all you can do:

- Can manage admin workflow
- Can manage student's workflow
- Can manage parent's workflow
- Manage employee's workflow
- Manage subject associated teacher workflow
- Batch tutor workflow

Ex-Students Management

Alumni are the strongest asset of an institution. When school and students share a good relationship with alumni, it not only boosts the possibility of employment for the students but also becomes a source of advertising for the institution.

Implementing school ERP software in your institution helps the institutes to manage the alumni relationship with faculties and students.

- Maintain a database of alumni.
- Can create alumni event.
- Institution get notified if alumni accept the event invitation.
- If alumni accepted the invitation then they can post a comment about an event.
- Event details can be edited at any time.
- An alumni event can be canceled by deleting the event.

Y Yearly Application Registration Management With Enquiry Module

Academic year starts with new registrations and it is the administrators' responsibility that the registration of each student should be managed properly. But sometimes due to the excessive workload of admins, ambiguity arises in this conventional process which delays the whole registration operation.

With the registration & enquiry management feature, applicants can quickly and easily make the enrollments online, at the same time parents or students can enquire about the courses and more. Results save the time of admin in data entry, centralized the data, improves the employee's efficiency and helps in tracking the applicant registration progress.

The screenshot displays the 'Course Applicants | Home' page in the Fedena School system. The interface includes a navigation menu, a search bar, and buttons for 'Add New Registration', 'Registration Courses', 'Settings', and 'Preview'. The main content area shows a list of applicants for the 2020-2021 academic year. A table lists the applicants with columns for registration number, name, date, status, and application fee. The table contains five entries, with the first two being 'Allotted' and the last three being 'Pending' or 'Discarded'.

☐	Reg No	Applicant Name	Date	Status	Application Fee
☐	5	Meenakshi R	21/01/2021	Allotted - G1 - A (2020-21)	PAID
☐	4	Jeet Mehta	28/02/2020	Pending	Not Paid
☐	3	Nitish Gupta	28/02/2020	Entrance Exam	Not Paid
☐	2	Neeraj Singh	28/02/2020	Discarded	Not Paid
☐	1	Ravi Singh	26/02/2020	Allotted - G1 - A (2020-21)	PAID

What all you can do:

Applicant Registration

- Create an online registration form and share it with prospective students.
- Manage/Edit/Delete registration of courses.
- Enable online course registration.
- Publish the URL of the registration form on your institution website.
- Create detailed report of applicant data, application form, fee receipts and more.
- Collect application fee through online payment.

Enquiry Management

- Parents/students can enquire about any course.
- Admin can check open and close enquiries for a year.
- Create and manage different stages of an enquiry.
- Customise enquiry form fields according to the unique requirement of your institution.
- Linked to the academic year to get a complete admission flow for the year.
- Track resources of enquiries and monitor notifications for every new application via email.

Z Zoom In

The school management system provides deeper insights into all institution operations. Render 360 degree zoom out the view on fees collection, payroll structure, assignment maintenance, attendance tracking, subject wise grades management for individual students, admissions process and many more.

Along with email and call support Fedena also provides video support, through which institutions can easily learn how efficiently they can use Fedena features. Check Fedena Tutorial Videos

Upcoming Features

- **Lesson Plan**

Syllabus plans can be created by the school at the start of the academic year. The structure can be defined by the school to capture the required details. Lesson plans can be created by the teachers for a specific duration like a week or a month. Teachers can record notes and comments against the lesson plan and send notifications to students and parents.

ABOUT FEDENA

Fedena is an all-in-one school & college management software. Fedena has everything your institution will ever need such as grade-book, parent-teacher collaboration system, attendance, fee management and other 50+ feature-rich modules. It helps in automating the everything, generating insightful reports and assist in making better decisions.

Our vision is to help schools run better. We believe in a world where the school's administration and operational tasks are simplified and automated using technology will be the one in which teachers can focus on teaching children better. Our products, services and business model ensure that any school in any location around the globe can start operating better from today!
